Product Descriptions

Cactus Wireless Flash RF60 The Cactus RF60 is unique among other flashes available on the market. With a built-in transmitter and receiver, it not only receives wireless signals, but it also functions as a commander to control other RF60s. Built-in wireless commander and receiver The Cactus RF60 is a 2.4GHz radio-based wireless portable flash with a built-in transceiver that runs on 16 channels. It operates in three modes, Local for on-camera operation, Maser and Slave modes for off-camera. To act as a commander, set an RF60 to Master and it can trigger an unlimited number of RF60 set as r
